KAD ERP - KEY BENEFITS

- KAD ERP is a cloud-based ERP system for enterprise resource planning software & tools that are hosted & managed offsite in the Cloud by your vendor. With Cloud deployment, you can focus on running your business rather than IT administration.
- Easily accessible from any geographical location via any browser over the internet.
-Recommended Browser's: Google Chrome, Mozilla Firefox or Microsoft Edge.
- Manage your most critical business functions & support your business decision with accurate information from anywhere, at any time.
- User Friendly with low implementation cost.
- Subscription licencing options avoiding capital expenditure and allowing for operational expenditure flexibility.
- Availability to implement Add-on modules based on your needs.
- Free upgrades or enhancements are available twice a year.
- If the number of users Exceeds 50 & the customer has its own server, an On-site Enterprises Solution can be provided on demand.
- Less operational management requirements.
- KAD ERP software provides flexibility and gives businesses the power to concentrate on growth and adapt to market changes, while continuously controlling costs, enabling productivity and optimal process efficiency.
- Better reporting tool with real-time information.
- Enhanced inventory & financial control.
- 99.99% service availability with real-time storage scaling option for a Cloud solution.
